Project Design Phase-1

<u>SOLUTION ARCHITECTURE</u>

Date	01 October 2022
Team ID	PNT2022TMID02964
Project Name	Personal Expense Tracker

PROBLEM STATEMENT

The Personal Expense Tracker System is developed to keep track of users' spending and make a prediction for their budget monthly. The system should be able to generate reports of their spending and notify users if they have exceeded their budget. The system also provides users' personal information, their income as well as their expenses. Expense Tracker System will be an approach for people to control their spending better in more efficient ways.
